

It is important in a free market system, that the Government not get involved or side with any individual or group to promote any type of service or product! As someone who travels extensively, It is important for me to go to one source to get weather and traffic information, its impossible for me to know where to find that information in each local market that I travel in!!!

For professional Travlers this can truly be a safety issue!!!!

Thankyou.....Now go do the right thing!!!!
